

# American Council of Engineering Companies of Kentucky Directory 2004-2005

The purpose of this directory is to foster a better understanding of the relationships between the client, the public and the professional engineer in private practice.

Firms listed in this directory are members of the American Council of Engineering Companies of Kentucky. The firms maintain offices or provide engineering services in Kentucky, are staffed by qualified, registered engineers and are pledged to uphold high professional and ethical standards. By their membership, they subscribe to the code of professional conduct established by law and are recognized as responsible, independent

and impartial experts in their fields of practice.

This directory of Kentucky consulting engineers will assist in securing qualified engineering services for any project. Information is also available on consulting engineering services in other states.

For more information about the American Council of Engineering Companies' member firms or members of the American Council of Engineering Companies in other states, contact ACEC-KY at 1.800.455.5573 or email us at: [acecky@kyengcenter.org](mailto:acecky@kyengcenter.org).

*Leadership is not so much about technique and methods as it is about opening the heart. Leadership is about inspiration – of oneself and of others. Great leadership is about human experiences, not processes. Leadership is not a formula or a program, it is a human activity that comes from the heart and considers the hearts of others. It is an attitude, not a routine.*

— Lance Secretan

- **Services**

Connolly Consulting Engineers specializes in delivering high quality mechanical and electrical consulting engineering services at a reasonable cost. Representative building design projects include a large quantity and variety of new and renovated buildings with total budgets near \$100,000,000 and emphasizing healthcare and research facilities experience.

In addition to building mechanical and electrical systems design, Connolly Consulting Engineers has a uniquely strong background in the design and troubleshooting of natural gas delivery, pressure regulation, and mechanical/electronic measurement systems. As a certified energy manager, Mr. Connolly performs facility audits and energy consumption estimates, life-cycle analyses, and other evaluation tools for mechanical systems and facilities design selection.

Mr. Connolly is personally involved and responsible for quality management and exceptional client satisfaction on every project.

*Engineering is a great profession. There is the fascination of watching a figment of the imagination emerge through the aid of science to a plan on paper. Then it moves to realization in stone or metal or energy. Then it brings homes to men or women. Then it elevates the standard of living and adds to the comforts of life. This is the engineer's high privilege.*

— Herbert Hoover
